Virginia Compared to the Other States

National Rankings on Taxes, Budgetary Components, and Other Indicators

**A Compendium of
Inter-State Statistics**
Prepared by Staff of the
Joint Legislative Audit
and Review Commission

Spring 2004

Preface

During its October 2003 meeting, the Joint Legislative Audit and Review Commission (JLARC) directed staff to develop inter-state comparisons of important benchmark areas. It was the consensus of the Commission that convenient access to current data on Virginia's rankings relative to other states in various fiscal and related areas would prove useful in the legislative decision-making process. Examples of data areas suitable for benchmarking include population, personal income, revenues, taxes, employment, and tuition at State colleges and universities. The Commission also expressed specific interest in determining the effect that Virginia's expenditures on local personal property tax (car tax) relief and Revenue Stabilization (Rainy Day) Fund deposits have had on Virginia's national rankings.

This special publication responds to the Commission's mandate. It has been designed as a quick reference in an accessible format and will also be available on JLARC's web site. JLARC staff would be pleased to receive comments and suggestions from Members on ways to improve or expand this compendium.

Philip A. Leone
Director

July 12, 2004

Contents

<i>Item No.</i>	<i>Subject</i>
1	Population
2	Per-Capita Personal Income
3	Annual Unemployment Rate
4	State & Local Revenue Per Capita
5	State & Local Revenue as a Percent of Personal Income
6	State Revenue Per Capita
7	Local Revenue Per Capita
8	State & Local Taxes Per Capita
9	State & Local Taxes as Percent of Personal Income
10	Local Taxes Per Capita
11	State Taxes Per Capita
12	Federal Grants Per Capita
13	Federal Expenditures Per Capita
14	State & Local Debt Outstanding Per Capita
15	Bond Ratings
16	State Expenditures Per Capita
17	State General Fund Expenditures Per Capita
18	State General Fund Expenditures as a Percent of Personal Income
19	State & Local Funding Per Pupil for K-12 Education
20	State Funding Per Pupil for K-12 Education
21	Average Salaries of Public School Teachers
22	Average Annual In-State Undergraduate Tuition at Public Institutions
23	State Government FTE Employment Per 100 Persons
24	Number of Local Government Units

Appendix: Methodology

Population (2003)

Rank	State	Population
1	California	35,484,453
2	Texas	22,118,509
3	New York	19,190,115
4	Florida	17,019,068
5	Illinois	12,653,544
6	Pennsylvania	12,365,455
7	Ohio	11,435,798
8	Michigan	10,079,985
9	Georgia	8,684,715
10	New Jersey	8,638,396
11	North Carolina	8,407,248
12	VIRGINIA	7,386,330
13	Massachusetts	6,433,422
14	Indiana	6,195,643
15	Washington	6,131,445
16	Tennessee	5,841,748
	50-State Average	5,804,928
17	Missouri	5,704,484

States with Population Below 50-State Average
 States with Population Above 50-State Average

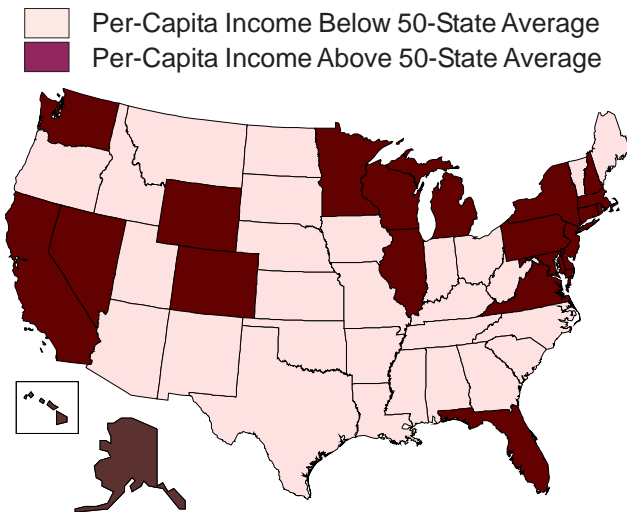

Notes

- Virginia's population grew from 6,189,197 in 1990 to 7,386,330 in 2003 – a 19.4 percent increase. This was the 15th largest percentage increase of any state.
- In contrast, North Carolina's population grew by 26.8 percent, the 9th largest percentage increase. Maryland ranked 22nd in population growth, with an increase of 15.2 percent.

44	Idaho	\$25,042
45	Montana	\$24,906
46	Utah	\$24,157
47	New Mexico	\$23,908
48	West Virginia	\$23,628
49	Arkansas	\$23,417
50	Mississippi	\$22,370

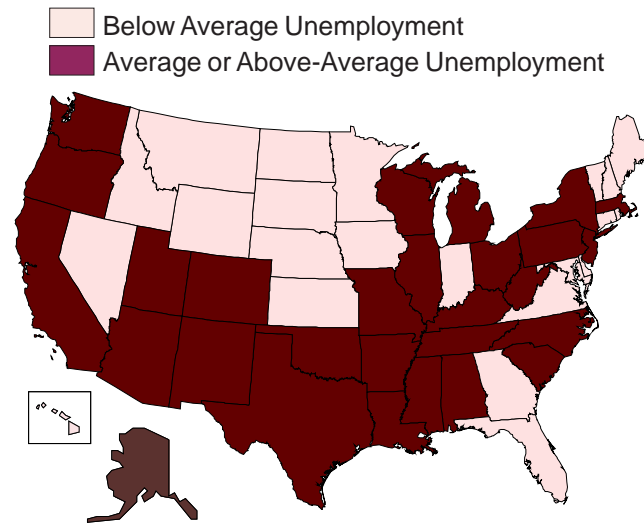

Notes

- Per-capita personal income is total personal income divided by total midyear population. Personal income is the sum of wages and salaries, other labor income, personal dividend and interest income, transfer payments to persons, rental income, and proprietors' income.
- Virginia's per-capita personal income grew from \$20,527 in 1990 to \$32,676 in 2002 – a 59.2 percent increase, which was the 30th largest increase. In contrast, North Carolina's per-capita income grew by 58.9 percent, the 32nd largest percentage increase. Maryland ranked 38th, with an increase of 57 percent.
- In 2000, Virginia had 16 of the 100 localities with the highest median household income nationwide.
- In 2002, Virginia ranked 12th in total personal income at \$238,325,281,000.

45	New Hampshire	4.3
47	VIRGINIA	4.1
48	Nebraska	4
48	North Dakota	4
50	South Dakota	3.6

Notes

- The unemployment rate represents the number of people who are 16 years and over, are able to work, and had made any effort to find employment during the previous month. The unemployment rate also includes persons who are waiting to be recalled to a job from which they had been laid off, or are waiting to start a new job within 30 days. The unemployment rate does not include the “underemployed” – those persons who are engaged in full- or part-time employment that is below their earning capacity or skill level.
- The national (as opposed to 50-state) unemployment rate in 2003 was 6 percent.
- Virginia has traditionally had a lower rate of unemployment than the nation as a whole. For example, in 1995 Virginia ranked 38th, with an annual rate of 4.5 percent, compared to the national rate of 5.6 percent.

Per-Capita Revenue Below 50-State Average
 Per-Capita Revenue Above 50-State Average

Notes

- Virginia ranked 14th in total state and local revenue at \$44,174,553,000.
- According to Census Bureau data, the total amount of revenue received by Virginia's State and local governments in FY00 (excluding inter-governmental transfers) came primarily from six sources: 48 percent from taxes, 21 percent from charges (such as tuition) and miscellaneous sources, 17 percent from insurance trust revenue (primarily employee retirement and unemployment insurance revenue), 11 percent from the federal government, 3 percent from utility revenue, and 1 percent from liquor store revenue. Please note that these classifications are created by the Census Bureau to ensure comparability between states.

46	Massachusetts	21.2%
47	Indiana	21.2%
48	Maryland	20.3%
49	Connecticut	19.8%
50	New Hampshire	18.7%

Notes

- Data for state and local revenues are for fiscal year 2000, which began July 1, 1999, and data for personal income are for calendar year 1999.
- Virginia ranked 49th in state revenue (FY00) as a percent of personal income (1999) at 10.3%; the national average was 14.1%.
- Virginia ranked 37th in local revenue as percent of personal income at 10.3%; the national average was 13.0%.

Per-Capita Taxes Below 50-State Average
 Per-Capita Taxes Above 50-State Average

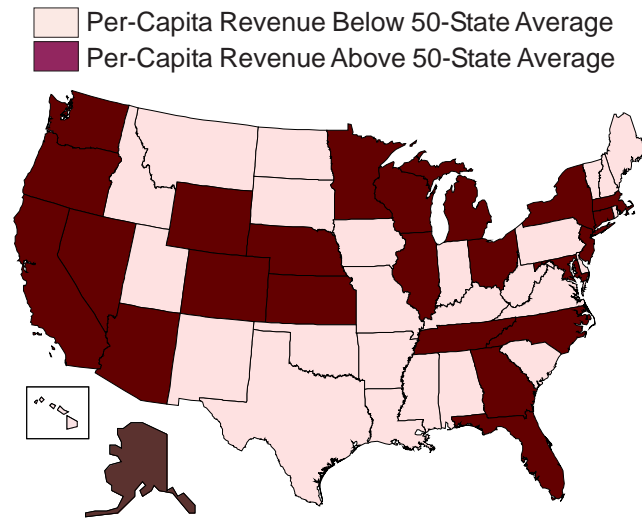

Notes

- Excluding payments for car tax relief of \$322,100,000 from local taxes, Virginia ranked 22nd in state and local taxes per capita at \$2,933.
- Virginia ranked 13th in total state and local tax collections with \$21,082,951,000. Excluding car tax relief, Virginia ranked 13th at \$20,760,851,000.
- These data are for the most recent year available for all 50 states. In FY04, \$892 million was allocated for car tax relief, almost three times as much as in FY00.

50	Hawaii	\$1,406

Notes

- Virginia ranked 14th in local revenue at \$21,171,860,000.
- According to Census Bureau data, the total amount of revenue received by Virginia's local governments in FY00 came primarily from five sources: 51 percent from State aid, 36 percent from locally-generated revenues, 10 percent from utility revenue, 2 percent from the federal government, and 1 percent from insurance trust revenue. Please note that these classifications are created by the Census Bureau to ensure comparability between states.
- In FY02, four locally-generated revenue sources accounted for 72 percent of local revenue: real estate taxes (46 percent), personal property taxes (10 percent), user fees (10 percent), and sales and use taxes (7 percent). Source: the Virginia Municipal League and the Virginia Association of Counties.

Notes

- States are ranked by the average value of their bond rating on a 10 point scale, with an AAA rating equal to 10 points, and a BBB equal to 2 points.
- Washington was downgraded by S&P on January 28, 2004, and Wisconsin was downgraded by Fitch on March 2, 2004.
- Arizona, Colorado, Nebraska, and South Dakota do not presently have any outstanding General Obligation debt.
- Virginia has maintained a AAA rating since 1938, longer than any other state.

Per-Capita Expenditures Below 50-State Average
 Per-Capita Expenditures Above 50-State Average

Notes

- Excluding payments for car tax relief of \$825,500,000 for FY02, Virginia ranked 31st in state general fund expenditures per capita at \$1,432. Excluding rainy day fund deposits of \$187,091,474 in addition to car tax relief, Virginia ranked 33rd in total state expenditures per capita at \$1,406.
- Virginia ranked 16th in state general fund expenditures with \$11,129,000,000. Excluding the car tax relief, Virginia ranked 17th with \$10,303,500,000. Excluding rainy day fund deposits in addition to car tax relief, Virginia's rank remained unchanged at 17th in total state expenditures with \$10,116,408,526.
- In FY04, \$892 million was allocated for car tax relief, almost three times as much as in FY00.

50	South Dakota	\$31,295

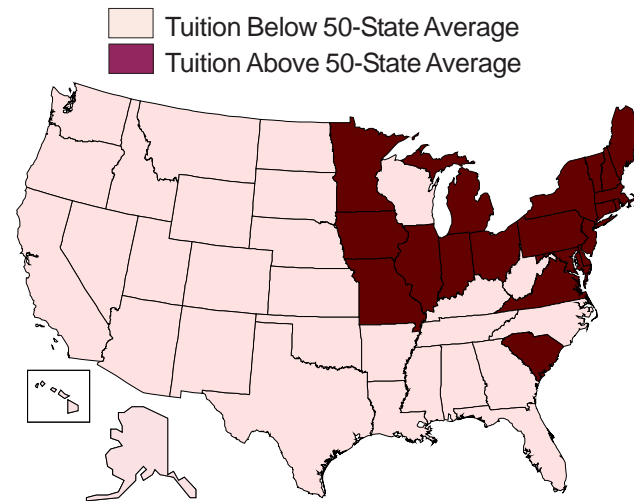

Notes

- The **national** average teacher salary (as opposed to 50-state average) as calculated by the NEA was \$44,714, and based on this calculation, Virginia ranked 23rd in 2001-02.
- The NEA calculates the national average by weighting each states' average salary by the number of teachers in that state. For each state, the average salary is multiplied by the number of teachers. The result for each state is summed, and the total is divided by the total number of teachers nationwide. Each state average is computed in a similar manner.
- In Virginia, the State's funded teacher salary in 2001-02 was \$37,559.

48	Wyoming	\$3,090
49	Florida	\$2,903
50	Nevada	\$2,698

Notes

- Average tuition and fees are weighted by full-time undergraduate enrollment.
- In 1993, according to data from the National Center for Education Statistics, Virginia ranked 6th in the nation, and tuition was 144% of the national average. The change in our national ranking has resulted in large part from an increase in State general fund expenditures for higher education.
- For more information on financial aid, please refer to the 1999 JLARC report, *Review of Undergraduate Student Financial Aid in Virginia's Public Institutions*, which is available online at <http://jlarc.state.va.us>

Government Employment Below 50-State Average
 Government Employment Above 50-State Average

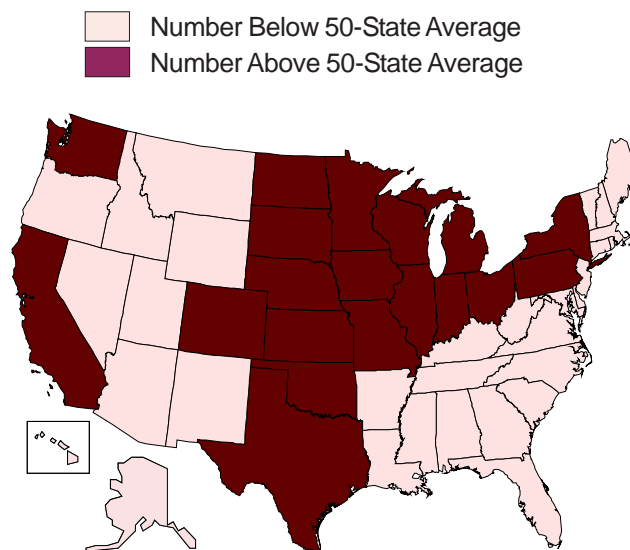

Notes

- Since 1998, Virginia has ranked between 23rd and 29th nationally in terms of the number of state and local government employees per 10,000 people.
- It should be noted that states vary as to whether certain major functions are accomplished through state agencies and their employees. For example, Virginia's Department of Transportation alone employs about 10,000 persons (about 8% of the state workforce), whereas the transportation function in some states is for the most part privatized.

49	Rhode Island	118
50	Hawaii	19

Notes

- Virginia ranked 47th for number of local government units per 10,000 people at 0.7 units.
- The Census Bureau's estimate for Virginia includes 95 counties, 39 cities, 190 towns, and 197 special purpose districts such as soil and water conservation districts. For Virginia, the Census Bureau does not include school divisions in the total number of local governments because they determined that divisions are dependent upon other local governments.

Source: JLARC staff analysis of U.S. Census Bureau, Census of Governments data (December 2002 revision).

Methodology

The data presented in the preceding tables represent the most current information available for all 50 states as of the publication date. Information on the District of Columbia and Puerto Rico are excluded. For each table, JLARC staff identified the primary source of the data, and used that information wherever possible. For 19 of the 24 tables, the data come from a federal statistical agency, typically the U.S. Census Bureau. Data were also obtained from the Bureau of Labor Statistics (U.S. Department of Labor) and the Bureau of Economic Analysis (U.S. Department of Commerce). Other data sources used in this report include the Virginia Department of the Treasury, the National Association of State Budget Officers, the National Education Association, and the American Association of State Colleges and Universities.

Most data presented are for the year 2000, although this varies by the source of the data. For example, data on state and local expenditures are available from the U.S. Census Bureau for fiscal year 2000, while data on state general fund expenditures are available from the National Association of State Budget Officers for fiscal year 2002. A source statement is provided for each table, which indicates the organization from which the data were obtained, and the date the data were last revised.

In order to ensure consistency in presentation, the data in each table are ordered from the highest value to lowest. For each table, JLARC staff calculated a 50-state average, which is the average value on the state level. The 50-state average is calculated by summing the value for each state, and dividing the result by 50. For example, per-capita personal income in 2002 ranged from \$42,829 in Connecticut to \$22,370 in Mississippi, and the 50-state average was \$29,556. The map which accompanies each table indicates which states rank above or below the 50-state average.

The 50-state average was chosen as the primary benchmark because it provides a better representation of the typical state than does the national average, which looks at the nation as a

whole. For example, per-capita personal income at a national level – the national average – is obtained by dividing the nation's total personal income (\$8,891,093,018,000) by the national population (288,368,698). The result for 2002 is \$30,832. It should be noted that the national average includes data for the District of Columbia and Puerto Rico, which are excluded in this report. In contrast, the 50-state average is calculated by summing across all 50 states and dividing by 50.

Other national averages, such as the National Education Association's (NEA) national average teacher salary, differ from the 50-state average because the NEA uses a weighted average: the average teacher salary in each state is weighted by the number of teachers in the state. National averages give the larger states (such as California and New York) far greater influence in setting the benchmark. The 50-state average, in contrast, weights each state equally.

The Commission expressed an interest in determining the effect that State expenditures on local personal property tax (car tax) relief and budget stabilization fund (rainy day fund) deposits have upon Virginia's national ranking. Tables throughout this report include Virginia's ranking both with and without these expenditures, where applicable. Tables 8, 9, 10, 16, 17, and 18 present Virginia's national ranking both with and without these expenditures. These adjusted rankings should be interpreted with caution, however, because sufficient data are not available to comprehensively adjust the tables for similar expenditures in other states. Moreover, any national ranking may mask substantial variations within a state.

Note: In all maps, the size and position of Alaska and Hawaii have been adjusted for readability and space considerations.
