

# Virginia Compared to the Other States

## National Rankings on Taxes, Budgetary Components, and Other Indicators

## A Compendium of State Statistics

Prepared by  
Staff of the Joint Legislative Audit  
and Review Commission

January 2007

---

## Preface

---

During its October 2003 meeting, the Joint Legislative Audit and Review Commission (JLARC) directed staff to develop interstate comparisons of important benchmark areas. It was the consensus of the Commission that convenient access to current data on Virginia's rankings relative to other states in various fiscal and related areas would prove useful in the legislative decision-making process. Examples of data areas suitable for benchmarking include population, personal income, revenues, taxes, employment, and tuition at State colleges and universities. The Commission also expressed specific interest in determining the effect that Virginia's expenditures on local personal property tax (car tax) relief and Revenue Stabilization (Rainy Day) Fund deposits have had on Virginia's national rankings.

In response to inquiries from the Commission, the following tables have been added to this edition: population growth (Table 2), the foreign-born population (Table 3), Medicaid spending (Table 21), and the uninsured population (Table 22).

This special publication responds to the Commission's mandate. It is designed as a quick reference in an accessible format and will also be available on JLARC's website. JLARC staff would be pleased to receive comments and suggestions from Members on ways to improve or expand this compendium.

Philip A. Leone

■ Per Capita Personal Income Above 50-State Average  
□ Per Capita Personal Income Below 50-State Average

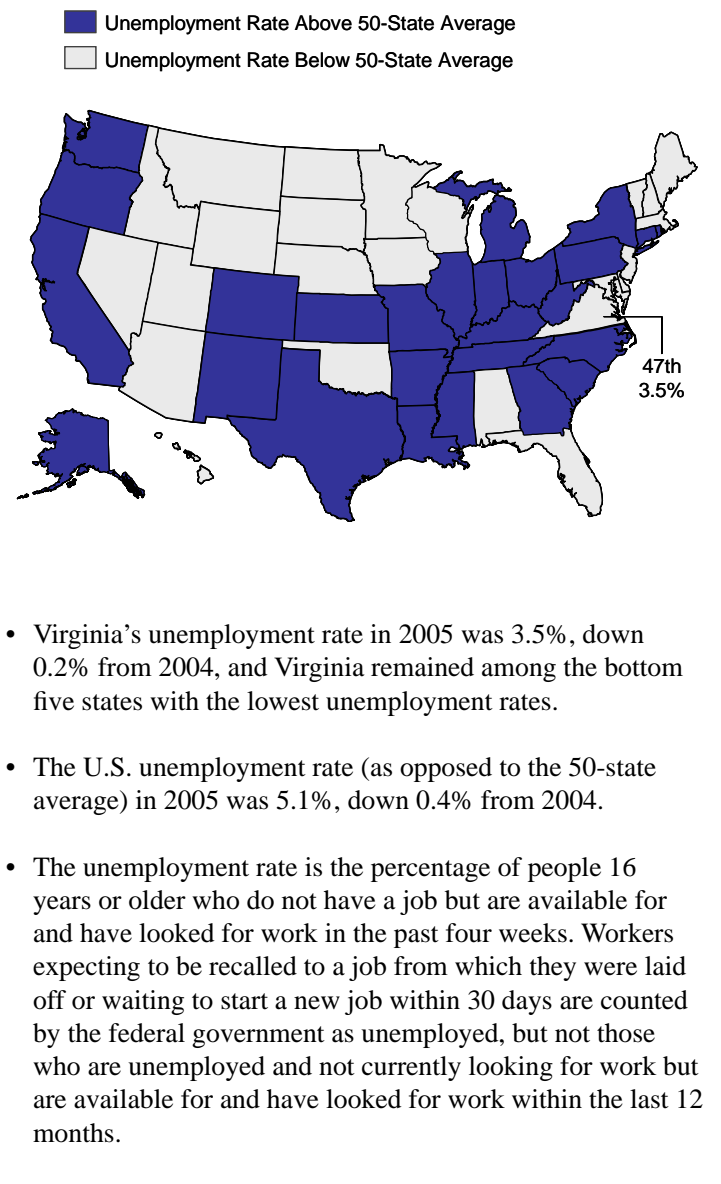

7th  
\$37,552

- Virginia's per capita personal income increased by \$1,377; however, Virginia's rank for this indicator did not change between 2004 and 2005.
- All states except Louisiana increased in per capita personal income between 2004 and 2005 with an average increase of \$1,338.
- Per capita personal income is total personal income divided by total mid-year population. Personal income is the sum of wages and salaries, other labor income, personal dividend and interest income, transfer payments to persons, rental income, and proprietors' income.

■ Per Capita State and Local Revenue Above 50-State Average  
 □ Per Capita State and Local Revenue Below 50-State Average

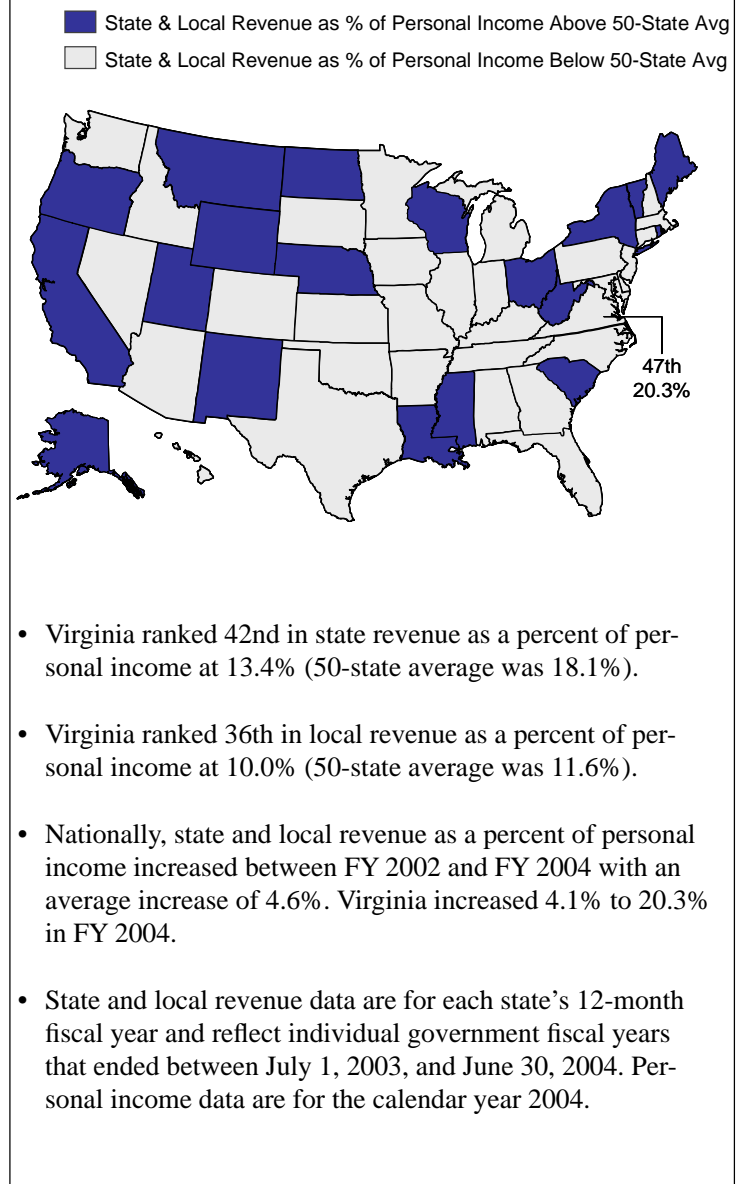

- Virginia's rank rose to 35th (from 45th in 2002) in per capita state and local revenue due to a gain of \$1,908 per capita—an increase of 36%.
- The total amount of revenue received by Virginia's state and local governments in FY 2004 (excluding intergovernmental transfers) came primarily from five sources: taxes, 46%; charges (such as tuition) and miscellaneous sources, 22%; insurance trust revenue, 16%; federal government, 13%; and utility revenue, 2%.
- All states increased in combined per capita state and local revenue between FY 2002 and FY 2004 with an average increase of 31%.

- Per Capita Local Revenue Above 50-State Average
- Per Capita Local Revenue Below 50-State Average

- In Virginia, per capita local revenue increased between FY 2002 and FY 2004 by \$446, and Virginia's rank rose from 31st to 27th.
- Per capita local revenue increased for all states with an average increase of \$360.
- Virginia ranked 14th in total local revenue at \$26.7 billion, including \$880 million paid by the State to localities for car tax relief.
- Total general government revenue received by Virginia localities came primarily from three sources: taxes, 40%; the State, 31%; and charges such as miscellaneous revenue, 16%.

■ State & Local Taxes as % of Personal Income Above 50-State Avg  
 □ State & Local Taxes as % of Personal Income Below 50-State Avg

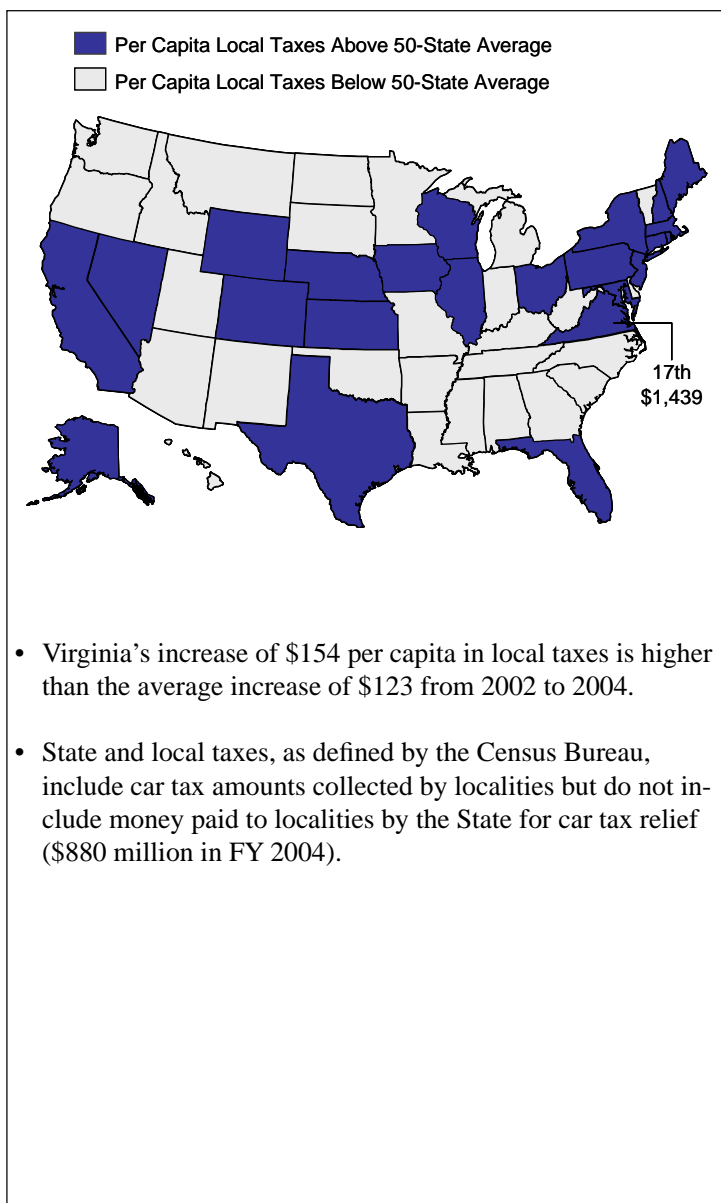

- Virginia's state and local taxes as a percent of personal income increased from 9.2% in 2002 to 9.4% in 2004. However, Virginia's rank fell by two to 45th.
- State and local taxes, as defined by the Census Bureau, include car tax amounts collected by localities but do not include money paid to localities by the State for car tax relief (\$880 million in FY 2004).

■ Per Capita Federal Grants Above 50-State Average  
 □ Per Capita Federal Grants Below 50-State Average

- Virginia received nearly \$8 billion in federal grants in federal fiscal year (FFY) 2004.
- Virginia ranked 49th in receipt of per capita federal grants; however, it ranked 2nd in per capita federal expenditures (Table 15).
- Federal grants consist of formula grants such as Medicaid and the National School Lunch Program, project grants for research or construction activities, and categorical or block grants.
- More information is in the 2003 JLARC report *Review of Virginia's Activity in Maximizing Federal Grant Funding*, available at <http://jlarc.state.va.us>.

■ Per Capita General Fund Expenditures Above 50-State Average  
□ Per Capita General Fund Expenditures Below 50-State Average

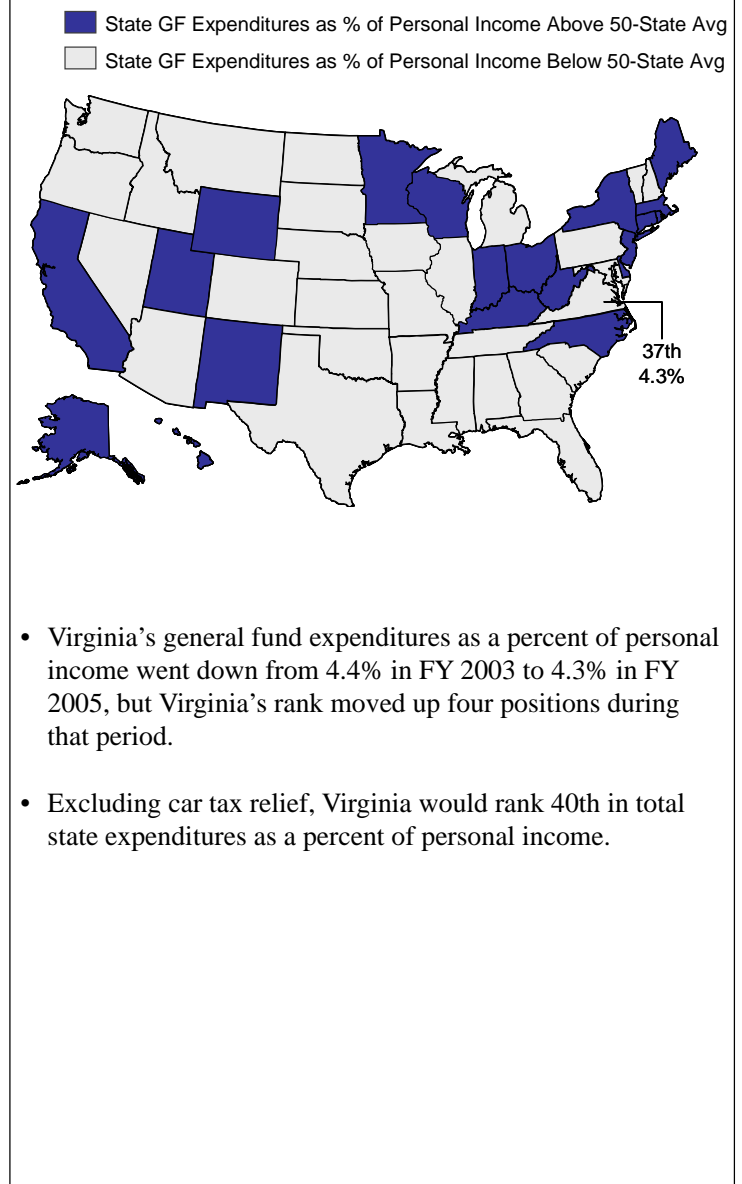

- Virginia's rank moved up from 29th to 25th from FY 2003 to FY 2005 for per capita general fund expenditures. However, Virginia ranked 28th when excluding payments of \$907 million for car tax relief.
- Virginia's rank moved from 16th to 14th for total general fund expenditures with an increase of more than \$1 billion from FY 2003 to FY 2005. Total general fund expenditures for FY 2005 were \$12 billion.
- General fund expenditures made up less than 40% of total state expenditures in FY 2005, with federal funds, bonds, and other nongeneral funds making up the remainder.

States With AAA Bond Ratings

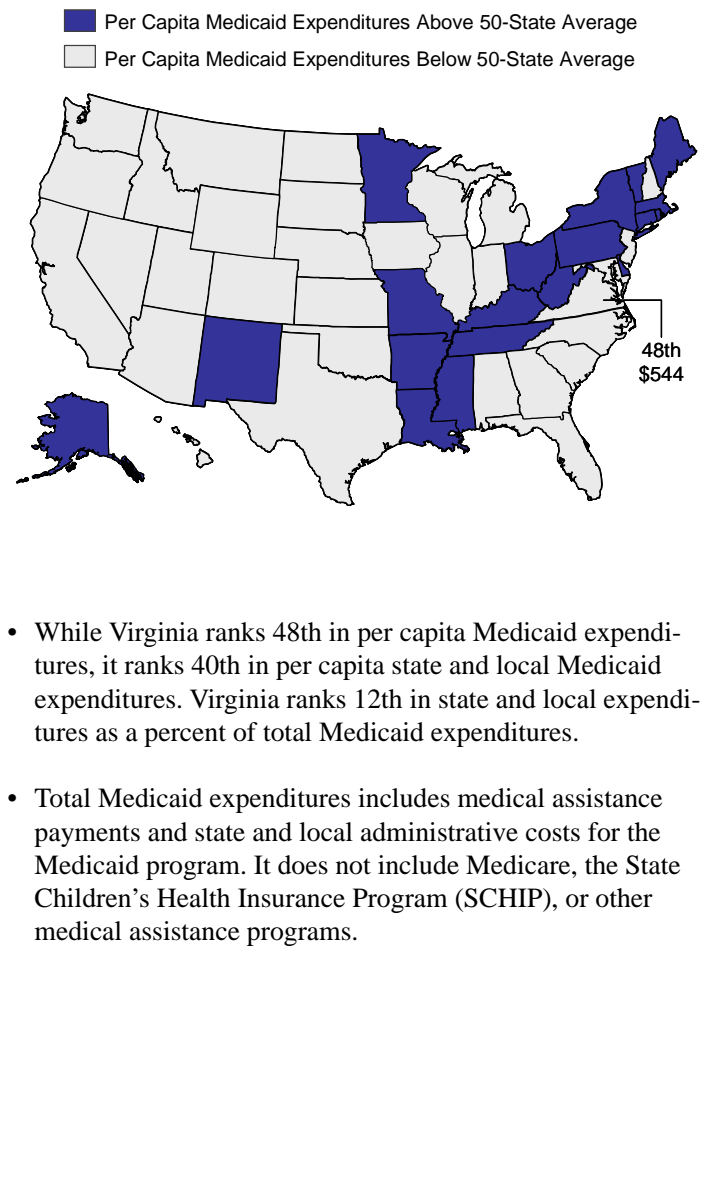

- Virginia has maintained the AAA rating since 1938, longer than any other state.
- States are ranked by the average value of their bond rating on a 10-point scale with a AAA rating equal to 10 points and a BBB equal to 2 points.
- Kansas, Iowa, Wyoming, North Dakota, Arizona, Colorado, Nebraska, and South Dakota have no current outstanding general obligation debt. However, five states (Kansas, Arizona, Iowa, Wyoming, and North Dakota) applied for ratings. These ratings represent the rates these states would likely receive if they decided to issue general obligation debt.

■ State & Local Funding Per Pupil K-12 Above 50-State Average  
□ State & Local Funding Per Pupil K-12 Below 50-State Average

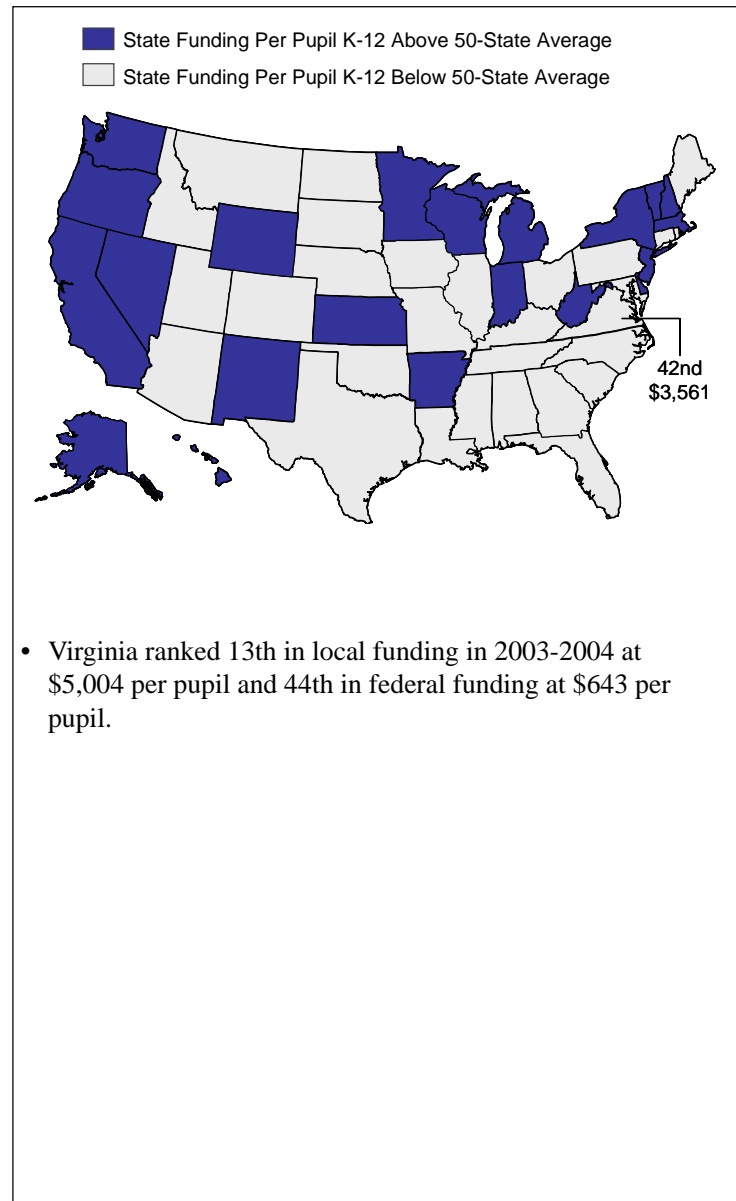

- Virginia's state and local funding per pupil rose by \$373 from 2002-2003 to 2003-2004, but Virginia's rank remained 22nd.
- Virginia ranked 27th in total funding per pupil at \$9,208 (including federal dollars).
- Virginia's per pupil funds are 54% local, 39% state, and 7% federal.

Average In-State Tuition Above 50-State Average  
 Average In-State Tuition Below 50-State Average

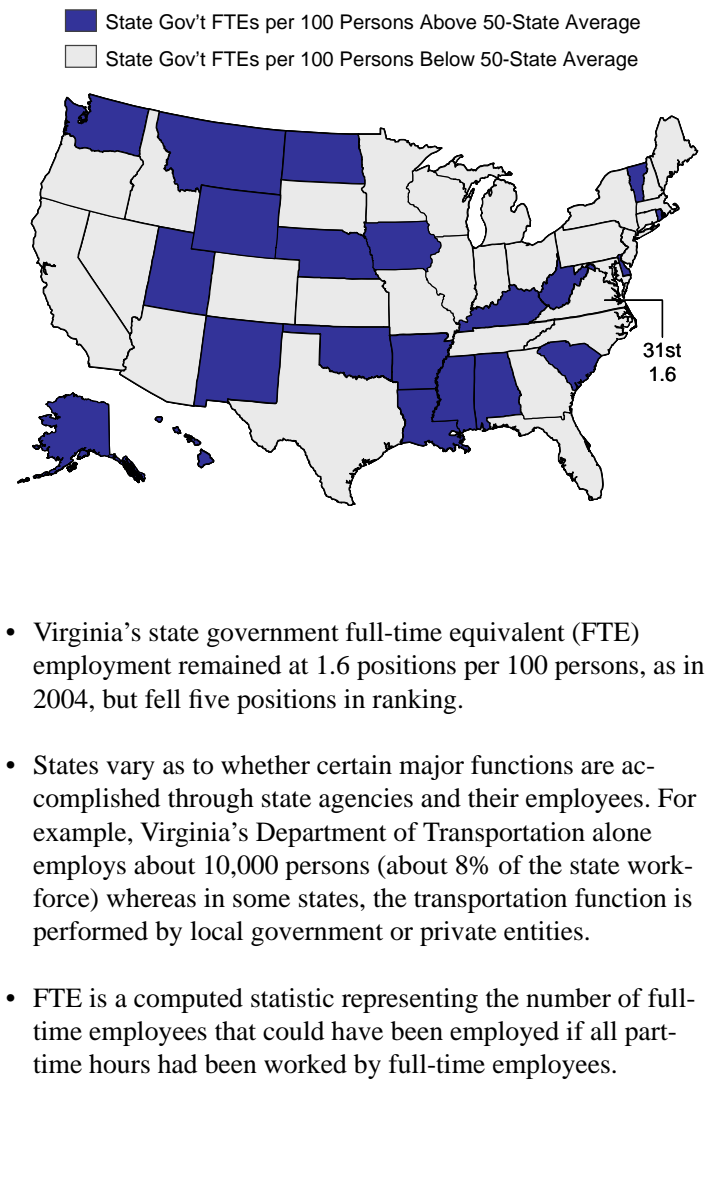

- Virginia's average undergraduate tuition rose \$414 from \$5,610 in the 2004-2005 school year to \$6,024 in 2005-2006.
- Virginia moved down in state rankings for average in-state tuition from 14th in 2004-2005 to 18th in 2005-2006 (same rank as in 2003-2004).

## Methodology

The data in the preceding tables represent the most current information available for all 50 states. Information on the District of Columbia and Puerto Rico are excluded. For each table, JLARC staff identified the primary source of the data and used that information whenever possible. Most of the data are from a federal statistical agency, typically the U.S. Census Bureau. Data also were obtained from the Bureau of Labor Statistics and the Bureau of Economic Analysis, the Virginia Department of the Treasury, the National Association of State Budget Officers (NASBO), the National Education Association, the U.S. Department of Health & Human Services Centers for Medicare and Medicaid Services, and the College Board.

Most data presented are for the year 2004 although this varies. For example, state and local expenditure data are from the U.S. Census Bureau for fiscal year (FY) 2004 while state general fund expenditure data are from NASBO for FY 2005. Census financial data are reported on a cash accounting basis.

The source of the data and the date the data were issued or last revised are indicated for each table. Additionally, tables presenting per capita amounts are calculated with the Census Bureau's report of mid-year population. For example, the tax data in Table 10 are for FY 2004 and the population data are for July 1, 2004. This practice is consistent with the U.S. Census Bureau's methodology for calculating per capita amounts.

In order to ensure consistency among the tables, state values are ordered from highest to lowest. If two states have the same value, they are given the same ranking. The tables only display state values to a certain decimal place, so states may appear to have the same value in the table but have different rankings because their actual values are different.

For each table, JLARC staff calculated a 50-state average by summing each state's value and dividing the result by 50. The map next to the table indicates which states rank above or below the 50-state average. The 50-state average better represents the typical state than does the national average, which looks at the nation as a whole (including Puerto Rico and the District of Columbia). Other national averages differ from the 50-state average because they use a weighted average, which increases the influence of the largest states. The 50-state average, in contrast, weights each state equally.

The Commission expressed an interest in determining the effect of State expenditures on local personal property tax relief (the car tax) and revenue stabilization (rainy day fund or RDF) on Virginia's national ranking. The sources used herein do not classify deposits to the RDF as a State expenditure. The Census Bureau classifies these trans-

actions as intragovernmental transfers, and NASBO considers them as adjustments to revenue (no NASBO revenue data were used). Therefore, tables are not adjusted to reflect deposits to the RDF although such deposits are noted in years in which they took place. Funds released from the RDF are counted as part of total expenditures in the year in which they were spent and are noted where applicable.

Tables 9, 16, 17, and 18 present Virginia's national ranking both with and without Virginia's expenditures for car tax relief. The dollar amounts of these expenditures come from the Virginia Auditor of Public Accounts' *Comparative Report of Local Government Revenue and Expenditures* for the corresponding fiscal year. These adjusted rankings should be interpreted cautiously, however, because sufficient data are not available to adjust the tables for similar expenditures in other states. Moreover, any national ranking may mask substantial variations within a state. Also, different agencies treat Virginia's car tax transactions differently. The NASBO expenditure data include state expenditures for car tax relief, and Tables 17 and 18 are adjusted accordingly. Treatment of car tax relief payments in the Census Bureau's expenditure data varies. The Census Bureau considers State payments for car tax relief as intergovernmental transfers. Therefore, those payments are counted as intergovernmental expenditure for the State, which is a subset of total State expenditures. Conversely, these payments are considered intergovernmental revenue for the localities, which is a subset of total local revenue. However, the Census Bureau eliminates intergovernmental transactions from combined state and local total amounts. Consequently, only Table 9, which reports only local revenue, and Table 16, which reports only state expenditures, are adjusted for car tax relief. Future editions of this publication will continue to track the effect of expenditures for personal property tax relief on overall state expenditure rankings.

Note: In all maps, the size and position of Alaska and Hawaii have been adjusted for readability and space considerations.
